

people doing strange things with electricity

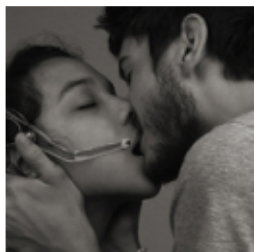

The 22.98977th dorkbot-nyc meeting will take place at 7PM on Wednesday, September 2, 2009 at Location One in SoHo. The meeting is free and open to the public. Please bring snacks to share. We're always looking for (and playing) more dorkbot theme songs! Bring or email one and we'll play it at the meeting.

Featuring the silvery and highly reactive:

Gaelen Hadlett: Electric Home Ec

While lending a hand at a couple local elementary schools, I work with kids on all sorts of projects involving engineering, science, and programming mixed in with everyday arts and crafts. I'll share highlights and missteps of past projects and the kids' responses to the advanced subject matter.

Hye Yeon Nam: The Sound of Kiss

The Sound of Kiss facilitates an amorous ambience in which couples digitize their love while kissing. One wears a headset and the other's tongue is affixed to a magnet. When they kiss, the magnet and the electro-magnetic sensor interact to create spontaneous music. The musical composition depends on how far one's tongue is away from the other's lips/tongue and their style of action.

Ben Woodeson: The Health and Safety Violations

Trained in Glasgow, Scotland, Ben Woodeson now lives in London, England. His practice revolves around absurd and quietly confrontational sculptures; the works set out to challenge the viewer and the exhibiting institution in a playful kind of art chicken. Since December 2008 he has been working on a new series of "deliberately dangerous" works entitled "The Health and safety Violations" and as part of Location One's Virtual Residency programme he has been collaborating with the artist Ursula Endleicher, they have never met but will spend the last week before the exhibition opens on 9/9 finalizing works together. He has shown throughout Europe, Canada, and America and he has an upcoming solo show at Electrohype in Malmo, Sweden.
